Energy² – Saving Energy, Generating Energy

Schüco USA L.P. – Pioneering Photovoltaic and Solar Thermal Systems

Newington, Conn., September 11/PRNewswire/ -- Schüco USA L.P., Connecticut-based specialist for energy-saving windows, doors, aluminum facades and solar technology, will be presenting pioneering photovoltaic and solar thermal systems for residential and nonresidential buildings at Solar Power 2007 in Long Beach, September 24-27, 2007. True to its vision "Energy² – Saving energy, generating energy" Schüco supplies integrated solutions for all building types. Schüco USA belongs to European market leader Schüco International KG, which has 4,700 employees and 12,000 partner companies in 77 countries.

In Long Beach, Schüco USA will be showcasing a newly developed, highly effective system for mounting PV modules on flat roofs. Safe, quick, and cost-effective, the system enables the largest possible number of modules to be mounted for maximum energy production. At Solar Power, Schüco has a further highlight in store: its latest high-performance photovoltaic modules, which combine technical perfection with an elegant and versatile design that is sure to appeal to architects and patrons alike.

Schüco USA also offers its solar customers – primarily solar integrators and installation companies – a wide range of training activities, including accredited seminars and certification programs. In addition, the company's "Solar Kit" provides customers with a powerful marketing and production presentation tool, including brochures, data sheets and other materials for boosting sales.

Schüco USA's German parent company, Schüco International KG, is a global player with fifty years' experience in aluminum, steel, vinyl window, and solar power systems. Schüco develops and produces building envelopes and integrated solar technology for all types of buildings, from private homes to skyscrapers. Always on the cutting edge, the company will begin producing highly efficient thin-film technology for innovative photovoltaic modules starting in mid 2008.
