WHAT WOULD IT BE LIKE ...
…TO HAVE EVEN GREATER POSSIBILITIES?

At Schüco, we ask ourselves this question every day. Not for ourselves, but for our partners – architects, fabricators, investors and private clients. What would it be like for you to have even more design freedom? What would it be like to have solutions available which enable you to fabricate even more professionally? What would it be like if we were even better, even more intelligent, even more efficient for you?
Digitalisation, demographic change, the fusion of work and private life and a new awareness of health and quality of life define our present and our future. We respond to these present challenges and opportunities with excellent performance and by making security, social responsibility and sustainable economic activity our priorities. These values are equally important for our company. With our worldwide network of fabricators, architects and developers, they become a physical reality.

EXCELLENCE THROUGH INNOVATION
We measure our products and services by their innovative strength. This allows us to play a significant role in creating future-oriented working and living environments. We take a holistic view of the requirements placed on efficient buildings and develop solutions which facilitate individual design.

SERVICE WITH RESPONSIBILITY
Our involvement should be so good that our partners like working with us and want to do so for the long term. To this end, we commit to consistently delivering our best performance and individual support. After all, what we create together today should also endure tomorrow.

Andreas Engelhardt
Managing Partner

“We are only satisfied when we are the first choice for our business partners.”
Schüco is a systems provider for windows, doors, façades and more. With over 65 years of experience. With more than 4,900 employees worldwide who strive every day to be the technology and service leader in the industry today and in the future. In order to achieve this goal, we consistently orient ourselves to the needs of our customers. In all phases of a building project. From the initial idea and design through to the construction and use of residential and commercial buildings worldwide.

IDEAS WITH A FUTURE.

WE GET TO THE HEART OF BEST PERFORMANCE – INNOVATIVE, RELIABLE AND WITH A GLOBAL NETWORK.

Innovation begins with a strong idea. It becomes a reality through targeted action, expert solutions and the drive to implement them.

Our range of services covers all phases of the building process. We ensure premium quality in the manufacture of our products. With modern warehouse and distribution centres, we ensure that all components are delivered to fabricators on time. They are supported by Schüco from ordering and fabrication through to installation.

We offer architects and developers advisory support from specification through to construction. Clients benefit from our sustainable and efficient solutions. As a result, we are always on hand all over the world to provide our partners and customers with valuable support.
We are an international company with qualified partners who create buildings in different countries. We see partnership as a long-term, sustainable business relationship from which all sides benefit equally.

In addition to a wide range of products and services, we are customer-oriented and offer extensive consultancy — with over 65 years of experience.

Moreover, we place great emphasis on close collaboration and continuous dialogue. This allows us to complement one another in the best possible way and carry out the design and implementation of high-quality and sustainable building projects in an extensive global network.

**OUR BUSINESS MODEL**

1. **RESEARCH, DEVELOPMENT AND TESTING**
   
   Innovative technology and extensive expertise
   
   Development and testing of products, tools and services for the whole building envelope, in accordance with standards and in consultation with the market.

2. **GLOBAL PROCUREMENT**
   
   Premium quality for all components
   
   Provision of market-driven products for the building envelope, based on the highest quality standards: profiles, fittings, automation solutions and accessories.

3. **STORAGE AND DISTRIBUTION**
   
   Professional logistics
   
   High availability of products and adherence to deadlines thanks to a state-of-the-art distribution centre and a flexible supply network.

4. **CONSULTATION, SERVICES AND TOOLS**
   
   Excellent, tight sales network
   
   Comprehensive support for architects, fabricators, investors and clients through expert individual consultation from design, fabrication and installation through to operation of the building.

   **Sustainable investment**
   
   For investors
   
   - Personal consultation for maximum planning reliability and cost certainty
   - Certified system solutions
   - Operational reliability

   **Reliable planning**
   
   For architects
   
   - Personal consultation
   - Specification texts
   - Support with special constructions
   - Digital process chain, e.g. BIM, AutoCAD files

   **Efficient fabrication and installation**
   
   For fabricators
   
   - Product, specialist and software training
   - Software and IT solutions for construction and fabrication
   - Machinery
   - Technical documentation
   - Support with advertising and sales

   **Sustainable building operation**
   
   For private clients
   
   - Security
   - Energy efficiency
   - Comfort
   - Design
   - Durability
   - Quality
INNOVATIVE SYSTEM SOLUTIONS FOR WINDOWS, DOORS, FAÇADES AND MORE.

Schüco has divided its activities into the Metal – aluminium and steel – and PVC-U divisions. In both areas, we offer our partners and customers sophisticated, proven system technology. We combine this with versatile materials, designs and application options. Our core expertise is in development, procurement, distribution and consultancy in relation to sustainable solutions for the building envelope.
Products, tools and services from Schüco support all aspects of the design of modern building envelopes. We enable the implementation of complex technical requirements from a single source. Based on a system or as an individual special construction.

**INDUSTRIAL AND COMMERCIAL PROJECTS**
In industrial and commercial projects, we support our partners with solutions which combine intelligent building technology, aesthetic demands and indoor comfort. This means that all requirements can be met in terms of building security and automation – from fire protection to access control. At the same time, all systems and products are tailored in such a way that they can be flexibly combined.

**RESIDENTIAL PROJECTS**
With windows, entrance doors, sliding systems, conservatories and balconies, we offer private and commercial clients holistic premium solutions for family homes and apartment blocks. All of our products can be individually tailored to one another, thus allowing energy-efficient building and modernisation to meet high standards in terms of aesthetics, design, security and comfort.
BEING BY YOUR SIDE IS OUR PRIORITY. SO THAT YOU CAN ACHIEVE MORE.

For us, providing the best possible support to our customers and partners comes first. Whether it is a construction company or private client, a commercial project or a family home. We commit ourselves to your project, making each one our own to a certain extent. With us you have expert, dedicated contact persons for a wide range of specialist topics. As a business partner of Schüco you secure a competitive advantage. And with the premium quality of our products, you can increase the total value of your property.
MORE FOR ARCHITECTS: PLAN WITH CERTAINTY, DESIGN WITH FREEDOM.

As a creator of buildings, you design the world in which we live. You are an expert, a designer and a visionary. You impress with your ideas. Sometimes spectacular, sometimes highly pragmatic. Always with the desire to enjoy creative freedom without having to forego planning reliability. After all, your clients demand these in turn. This is why you need reliable options. With us you receive exactly that.
Increasing technical requirements, the growing complexity of legal regulations and the ever-present pressure on costs make planning a challenging process. Schüco offers a range of services to support architects, saving time and reducing the effort required for conceptual work.

We provide you with individual consultations and specific solutions. In the process, we draw on decades of experience with wide-ranging projects from around the world as well as constant dialogue with internationally renowned offices. In this way, you can be sure that we foresee and incorporate all important trends in our products.

**WE OFFER ARCHITECTS EXPERTISE AND FREEDOM TO IMPLEMENT THEIR IDEAS.**

**INNOVATION MEETS CREATION**

The building envelope today offers countless new possibilities in terms of functionality and networked control. At the same time, there are ever fewer limits on aesthetic design. With tailored, intercompatible products from Schüco, sophisticated projects can not only be reliably planned, they also offer freedom to all for creative design solutions.

"Digital design tools and individual technical solutions from Schüco allow valuable time for creativity."

**We offer you specific support for your individual design.**

Better planning and successful implementation with Schüco

- System and special constructions for the realisation of unique designs
- Individual consultation from the first planning step
- Digital process optimisation for efficient planning and specification
- Planning modules available to download
- Energy-efficient solutions in accordance with the most stringent standards and norms
SOPHISTICATED PRODUCTS
Three-dimensional freeform façades are part of the supreme discipline in contemporary construction. What was previously only possible with expensive special constructions is easier to design and implement through system solutions from Schüco, without neglecting energy efficiency requirements.

Schüco façade systems enable very narrow face widths with visually-integrated windows which fulfil the most demanding aesthetic and technical requirements.

DESIGN BASED ON DIGITAL TOOLS
The closed data chain will change the construction process profoundly. New software solutions integrate all interfaces from design through to production. Here Schüco offers configurable systems and solutions that are already one decisive step ahead. You can select suitable options and view their technical documentation via online access to the product database.

We will continue to focus on the development and construction of intelligent, sustainable and perfectly formed building envelopes. After all, architects should be able to see far into the future with us by their side as their reliable partner.

“From security and the indoor climate through to control, a building envelope from Schüco can contribute so much that it impresses even the most demanding clients.”

MORE FOR FABRICATORS:
IMPRESS ACROSS THE BOARD – IN CONSTRUCTION, FABRICATION AND INSTALLATION.

Your challenges move within the field of conflict between planning, fabrication and installation, while customers need to be looked after and further orders need to be acquired. Alongside this, it is also important to press ahead with promoting your business. We support you throughout the entire process chain. After all, we give you much more than just a product. When you work together with Schüco, you receive individually tailored services for your business which fulfil your wishes as well as those of your customers.
WE MAKE FABRICATORS EVEN MORE COMPETITIVE WITH SMART SOLUTIONS.

“As technical possibilities increase, so does the complexity of your workflows. This is why every simplification of the fabrication and installation process is so valuable. At the same time, efficient and reliable solutions are essential. With Schüco, you can work to the highest standards and distinguish yourself from the competition.

EASIER, QUICKER, MORE SECURE

Professionalism is our top priority, regardless of the size of your business. We provide you with extensive support, from construction software through to the optimisation and automation of fabrication. In doing so, we give you targeted advice in the areas which are important for you, and find the right way to a successful design together.

We are always exchanging ideas with our fabricators about how we can improve the process chain, from construction, fabrication planning and work carried out in the workshop through to implementation on the building site. We give you smart, professional solutions with which to satisfy your customers.

“What matters most to me is an efficient work process, sustainable results and the satisfaction of my customers. I need these to survive in the market place.”

Working together in perfect harmony

➔ Support with acquisitions and order processing
➔ Design and fabrication software
➔ Machinery for fabrication and installation
➔ Technical documentation
➔ Accredited Technology Center for individual tests

With Schüco you can offer your customers higher quality and better service.
Systems and services from Schüco are designed to be fabricated in the most simple and economical way possible. Their high level of quality and foolproof design ensure fabrication and installation in which errors are easily avoided and complaints reduced to a minimum.

TECHNOLOGY THAT OFFERS MORE
Our research and development aim to deliver the best results together with our partners. Both our products and our range of machinery and software are geared towards generating competitive advantages and always finding new opportunities in the market.

The SchüCal software combines design, job planning, fabrication, installation and documentation. SchüCal mobile allows access to current data via smartphones and tablets, either on the move or at the building site. The Fabrication Data Center provides metal fabricators with all the information necessary for fabrication, ensuring that the distance between office and workshop is short.

DESIGNING THE FUTURE
Those who value customer satisfaction need to provide extensive, sound advice during sales. To help you with this, we are developing a range of helpful tools, such as a configurator, enabling you to present the Schüco range convincingly during acquisition talks and customer consultations. Furthermore, in future we will be offering you more and more documents and brochures in digital form, so that you can use them in a flexible manner and make them available to interested parties quickly and easily. In this way, with Schüco you will remain fit for the future.

Ensure success through innovation

- Systems and services with a high level of operational reliability
- Extensive IT tools for planning, fabrication and installation
- Computer-aided machine control
- Multifaceted program with video tutorials, workshops and training courses

“The wide range of workshops and training courses helps me to maintain my technical skills and be well-prepared for the future.”
Investments need security – both in the planning stage and when calculating costs. Construction projects must measure up to technical and aesthetic standards. They also need to have long-lasting operation and retain their value when resold. In order to achieve this, it pays to work with partners who, like you, also consider these aims to be integral. As experts and consultants, we accompany you across the entire life cycle of a property, so that you can continue to be more successful in the long term.
IN TERMS OF SECURITY, ENERGY EFFICIENCY, AESTHETICS AND COMFORT, THE BUILDING ENVELOPE PLAYS A KEY ROLE TODAY, BOTH IN NEWBUILDS AND WHEN MODERNISING EXISTING BUILDINGS. IT MUST BE INCREDIBLY RELIABLE OVER A LONG PERIOD OF TIME, IN ALL CLIMATE ZONES OF THE WORLD. AT THE SAME TIME, IT OFFERS MUCH GREATER FREEDOM FOR FAÇADE DESIGN.

IMPRESS WITH TECHNOLOGY AND DESIGN
Innovative building technology and proven system solutions bring a higher level of quality to residential and office properties. The value of a property is also measured considerably by its appearance. We offer systems which merge into one building envelope with an attractive appearance and complex functionality. This makes it possible to achieve individual design specifications cost-effectively and to a high quality. For all Schüco products, we offer comprehensive application consultancy and guarantee functional performance during construction and operation.

SERVICES WITH A FUTURE
For us, economical construction does not end with the commissioning of the building. Sustainability is an important part of our service. So that your investments have a secure future.

BUILDING ENVELOPES FROM SCHÜCO ARE RELIABLE, SUSTAINABLE AND DELIVER HIGH PERFORMANCE.

ÖBB headquarters, Vienna, Austria
Schüco window and façade systems as well as special constructions

Creating value through quality

- Effective, comprehensive consultation
- Planning reliability and durable system solutions from a single source
- High-yield solutions for the building envelope
- Outstanding aesthetic quality
- Pioneering automation
MORE FOR PRIVATE CLIENTS:
A COMFORTABLE, SECURE HOME WITH AN INDIVIDUAL DESIGN.

When building your home, you want to make full use of contemporary technical possibilities, while creating individual designs. You think ahead and plan for the long term. This is why you attach great importance to quality. You are looking for a sustainable construction which focuses on your needs. A house in which you can feel safe and secure. We provide you with support, so that you can get the most out of your individual building project.
Premium residential construction with windows, entrance doors and sliding systems from Schüco.

Schüco makes your home comfortable, sustainable and secure.

WE OFFER PRIVATE CLIENTS EVERYTHING UNDER ONE ROOF: HIGH-QUALITY LIVING, ENERGY EFFICIENCY AND UNIQUE DESIGN.

"With so much light and air, our house feels even bigger than we imagined. Everything works exactly the way we want it to as well."

Modern living combines protection against temperature, noise and break-ins with user-friendly, resource-conserving technology and attractive design. Schüco has been setting precisely these standards for decades.

SECURITY MEANS MORE COMFORT
The combination of form and function is of great importance to Schüco. The solutions with which we design visually attractive, sophisticated constructions are just as versatile as our materials, colour options and designs. Slim profiles, concealed fittings and elegant handle design ranges create a high-quality look. A timeless appearance will always be a central aspect of our product development, so that you can also enjoy the best views in the future.

STYLISH INSIDE AND OUT
Reducing energy consumption and costs
High-quality windows and doors consistently reduce the energy consumption of a house – and hence your operating costs, too. Modular door and window systems offer exceptional thermal insulation. Easy to operate, and sustainable in practice.

Focusing on your requirements

→ Intelligent door systems for greater comfort and security
→ Window technology and ventilation concepts for optimum energy efficiency
→ Thermal insulation to passive house level
→ Seamless integration of inside and outside through large-format sliding systems
For more than five decades, we have worked intensively with the performance of materials and constructions against a variety of external factors and loads. We use this expertise to accompany our own product development and support our partners as a manufacturing laboratory with project-specific testing. The Schüco Technology Center is accredited by the national accreditation body for the Federal Republic of Germany (DAkkS) as an independent (manufacturing) test laboratory and DAkkS calibration laboratory. This means that we offer secure, reliable and independent results based on globally recognised competence standards in the areas of test facilities, staff and organisations.

TESTING AND OPTIMISING
Building component, material and environmental tests are some of the main specialist areas of the Schüco Technology Center. We also test the electromagnetic compatibility of building components and calculate the bullet resistance of highly secure constructions. In addition, we improve the quality of Schüco products in line with standards with the help of a wide variety of tests for acoustics, weathertightness, security and durability. Deficiencies can be quickly identified and eradicated with the aid of measurement technology that is in line with national standards and expertise in evaluating results.

RESEARCH AND DEVELOPMENT
Even when beginning to develop products, we are able to fabricate, test and continually improve new systems, individual fabrication components and special solutions, and continually validate the results. Using our own test samples, we test the long-term durability of doors and the ageing behaviour of materials under the influence of heat, cold, moisture and UV light.

THE SCHÜCO TECHNOLOGY CENTER: ACCREDITED, EXPERIENCED, INDEPENDENT.

The wide range of functions and standards which must be fulfilled by modern building envelopes in all climate zones means that the requirements for high-quality tests increase too. The Schüco Technology Center in Bielefeld is one of the world’s leading test centres for products for the building envelope.
TAKING MORE RESPONSIBILITY: FOR PEOPLE AND THE ENVIRONMENT.

For Schüco, one aspect stands above all others: taking responsibility. With our products and with our business. Within and outside the company. With innovation, efficiency, outstanding service, optimum interaction between technology, sales and marketing, intensive communication between international Schüco subsidiaries – and with a clear approach which makes people the main focus.
WE WANT TO SET NEW STANDARDS – 
FOR LIVING, WORKING AND 
THE WORLD OF TOMORROW.

For us, social and technological change means working together to design secure, healthy and sustainable living environments for a globally networked society.

Those who have worked with us know that an enthusiastic, thriving culture of innovation and communication on an equal footing is what sets us apart from the rest. We want to be the best by far. All of our customers and partners should benefit from this, on a global level too. We continue to align our economic activity with the different markets.

In our business activities, we take responsibility for people and the environment. Employees at Schüco are committed to fair conduct towards customers, suppliers, competitors and authorities.

Our products fulfill the requirements of all climate zones around the world. It goes without saying that our range also meets all legal requirements and standards that apply in the relevant countries. Furthermore, we align our services to match the conditions and business culture of different markets.
WE ARE PIONEERS AND ROLE MODELS – IN EVERY RESPECT.

At Schüco, the focus is on the people. For us, this means offering our employees individual development opportunities and a pleasant working environment. We would like to lead here in the same way as we do with our products and solutions.

Anyone who sets ambitious goals like we do, as one of the market leaders, needs one thing above all else: people to help achieve them.

SECURITY – INDIVIDUAL RESPONSIBILITY – APPRECIATION

The huge market success of Schüco, the positioning as a pioneer and visionary of an entire industry, the unique business model and the mission to always be the best all form a strong basis for our employees. This basis will also ensure further growth and hence job security in the years to come.

At the same time, we are currently undergoing a deliberate cultural change. Alongside exemplary innovations, this can already be seen in our corporate culture, which allows employees to work independently within a team and the company, and therefore feel appreciated. In addition to this employer promise, Schüco also, of course, offers various benefits in order to provide a good work/life balance.

Our employees are an important source of ideas – especially those who back unconventional ideas. With their help, we would like to further develop our market position as technology and service leader.

For more information on Schüco as an employer, visit www.schueco.com/career.

What we offer our employees

WORK/LIFE BALANCE
For example: Flexible working models, leisure time, working from home/ mobile working

ADDITIONAL SERVICES
For example: Discount when purchasing Schüco products, employee PC programme, E-books, online shopping (corporate benefits)

PAY
For example: Holiday pay and Christmas bonus, special company payments, capital-forming payments, company pension scheme

FURTHER EDUCATION
For example: In-house state-of-the-art training centre, subsidy programmes, e-learning

HEALTH
For example: Subsidised canteen, fun runs, company sport Schüco sport brand ambassadors, discounted rates for various gyms
In your role as architects, fabricators and investors, you create something that endures. Architecture which emerges today in residential and commercial construction will define our life for decades to come. At the same time, digital solutions will significantly change construction processes.

We know how demanding building is today. And how we can support you fully, from planning through to implementation of a building project.

As one of the market leaders, we strive every day to develop innovative technology and services. Together with you we therefore create sustainable buildings for the future which are even more intelligent, comfortable, and secure.
EXPERIENCE OUR BRAND AND TECHNOLOGY IN THE SCHÜCO SHOWROOMS.

Being where the decision makers are is the idea behind the Schüco showrooms. With stylish exhibits, samples of different Schüco systems, digital presentation options and qualified specialists, you can experience the Schüco brand and products in person. For more information about our showrooms, visit: www.schueco.com/showrooms

Every country and every market has its own individual requirements. Involve Schüco at an early stage to make your project successful. Make an appointment at one of our showrooms around the world now.
INNOVATIVE FROM CONViction.
DURABLE BY TRADITION.

1950 – 1969
1951 Heinz Schürmann, a pioneer in the young Federal Republic of Germany, founds the company Heinz Schürmann & Co. in Porta Westfalica. In a small backyard with six employees, he produces shop windows, awnings and rolling grilles.
1964 Sale to technology company Otto Fuchs KG in Meinerzhagen.

1970 – 1989
1970s Schüco develops into a system supplier for aluminium windows and doors. The company establishes new sites across Germany, continually expanding its sales network.
1980s Schüco becomes increasingly international with licensees in Europe. In addition, the company quickly recognises the potential of versatile PVC-U and expands its product portfolio accordingly.

1990 – 1999
1990s In East Germany and eastern Europe, building renovation with eco-friendly building materials presents a major challenge. Schüco seizes this opportunity and expands its international business further. At the same time, the company enters the solar market and targets large commercial projects.

2000 – 2009
2000s Schüco extends its business into the USA, South America and China. With its three divisions – Metal, PVC-U and Solar – the company is a specialist for the entire building envelope.
2005 The Schüco Technology Center in Bielefeld is accredited as an independent and certified test institute.

2010 to present
2012 Andreas Engelhardt appointed Chairman of the Schüco Executive Management Board in October. Schüco focuses on the core business in the Metal and PVC-U divisions.
2013 Schüco presents the Parametric concept and the new SimplySmart generation of fittings. The 800 m² showroom is opened in Bielefeld in December 2013.
2014 Andreas Engelhardt becomes CEO and Managing Partner in September.
2016 Schüco starts to expand its Bielefeld site with its largest internal newbuild and renovation project, for which a total of 95 million euros will be invested. Various showrooms are opened around the world.
2017 Schüco celebrates its 66th birthday on 18 January at world’s leading trade fair BAU.
2018 Schüco expands its product portfolio with a stake in Sälzer GmbH in Marburg and the acquisition of Soreg AG in Switzerland. Schüco also helps to set up the first certificate course on digitalisation in metal fabrication for the German Chamber of Industry and Commerce.

2012 Sale to technology company Otto Fuchs KG in Meinerzhagen.
