

Schüco Mandeo

The infinite shelving system

Creativity without limits

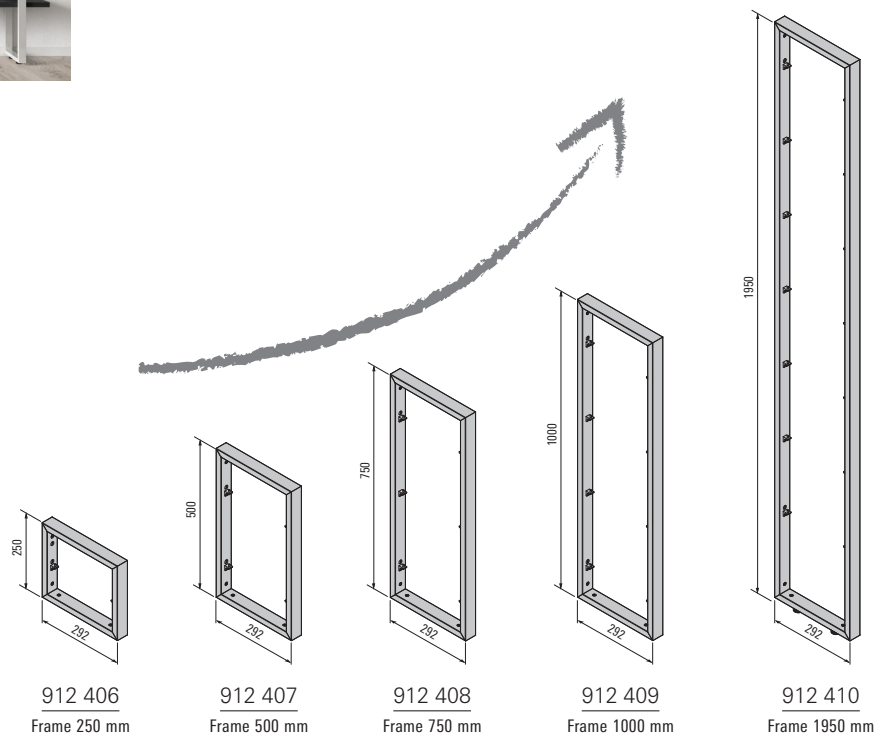

The Schüco Mandeo shelving system uses a simple principle to offer a number of design options. Robust aluminium profiles are used in this eye-catching frame system that enhances every living space. It provides additional storage space, showcases favourite pieces and is the perfect organisation system. Its design can be customised and extended as required.

Individual frames can be combined for a flexible arrangement and look. They can then be attached to the wall, freestanding, or a combination of the two. There are virtually no limits.

The robust shelving frames are available in black and anodised stainless steel, forming the basis for a custom design.

When combined with the various finishes and colours of the shelves, they create a design feature that suits any taste and lifestyle.
