Frame 1950 mm 100007826 E6/stainless steel 100007823 E6/C35 black

The system limits are described in the **installation instructions**, **Art. No. 100002257**. The load capacity of the system was determined based on tests carried out within the framework of the applicable regulations and standards from the furniture and kitchen industry. It requires compliance with all the assembly steps described in detail. Deviations from the implemented specifications have an impact on the stability of the shelving system. Exceeding the system limits is not covered by our tests and is your responsibility to validate. We will gladly provide you with the test results of the system we have developed for your analysis upon request.

Please be sure to note: The supplied fixing (anchor) is only suitable for concrete walls and solid building materials (for example, sand-lime brick). The installation materials must be checked by the installer for their suitability at the intended installation location.
