Where to look for machine support (MCO) in SchüCal:

General » Help » Profile systems

The article library (DXF files and clamping position) for double mitre saws is created in SchüCal:

General » Master data » User-defined clamping position (separate installation instruction available)

Update tools

General Download Finder (GDF)

Version 3.2.4

Schüco Website

[Here](#) you will find the download page for Schüco software products

GDF download is available on the website
