

SchüCal by download

As of version 2018, SchüCal is provided as download from our Schüco Digital Server.

The installation of the program starts after the setup file has been downloaded.

You can download the Schüco installer for SchüCal here:

- **SchüCal (64-bit version):**
http://download.schueco.digital/setup/schuecal-x64_downloader.exe
- **SchüCal (32-bit version):**
http://download.schueco.digital/setup/schuecal_downloader.exe

Please read the following information prior to installation

01. User rights

Check that you are logged on as a user with **rights** to install software on the system.

02. Microsoft .NET Framework

SchüCal requires the Microsoft .NET Framework version 4.0 or higher. If .NET is installed on your computer in an earlier version, the latest version of .NET will be installed automatically.

03. Licensing your SchüCal software

For processing of different materials and the use of extended program functions, licenses and activation codes are usually required.

Schüco Digital is breaking new ground in licensing and thereby offering you additional protection for your Schüco software products. You can find more information in the attached explanations. Our Schüco Digital Support staff will be happy to help you with this.

04. Simplified network installation

Option: Generate server mapping for installation

Following the download in your download directory, call up "setup.exe" with the parameter "/ a".

Specify the location where you would like to save the network in the target folder dialog box.

Before installing on a network, make sure that all users have exited the SchüCal program.

05. IMPORTANT: Computer restart

Before installing a new SchüCal version, please always restart your computer.

This ensures that no Windows updates, which also require a restart, block the installation of SchüCal and associated components.

Installing SchüCal

Once the download is complete, the SchüCal installation starts automatically.

- First select the **language for the installation** routine.

In the **welcome dialog** you will receive information about **Schueco LinkUp**, a so-called firewall rule, which ensures communication between **SchüCal** and **SchüCal mobile**.

- Click on *Next* >.

01. Notification of contractual data processing (GDPR)

- Please read the notification of contractual data processing (GDPR) and then confirm by checking the checkbox "*I acknowledge this notice*".

- Subsequently you click *Next* >.

02. License agreement

- Read the license agreement and then click the option: "*I accept the terms in the license agreement*".

- Then click *Next*>.

03. Destination folder

- Confirm the default destination folder to which the program is to be installed.

If you want to install the program to a different location, click the *Change...* button. In the following dialog box, select a different destination folder or create a new folder.

- Click *Next* >.

04. Anonymous user statistics / Starting installation

If you do not want to send anonymous user statistics from SchüCal to Schüco, deactivate the checkbox *Send anonymous user statistics to Schueco*.

More information about the SchüCal user statistics are available after clicking on the *Information...* button.

- Then click *Install*.

05. Completion of installation

When the installation process is complete, a message to this effect is displayed.

Search for current updates

After installation, the program can automatically search for current updates. The option is activated by default. Deactivate this option if you do not want the program to search for current updates.

- Exit the installation wizard by clicking the *Finish* button.
